Education

Pillai College of Engineering, New Panvel - 410206

Dec 2021 – May 2024

B.Tech in Information Technology

CGPA 9.4

Specialization in **Cloud Computing**

P.V.G'S Vidya Bhawan, Nerul, Navi Mumbai - 400706

June 2019 – May 2020

H.S.C (PCM + CS)

87% (Rank 1)

P.V.G'S Vidya Bhawan, Nerul, Navi Mumbai - 400706

June 2017 – May 2018

S.S.C

94% (Rank 2)

Work Experience

Godrej Infotech

July 2024 – Present

ERP System Administrator (Assistant Manager)

Mumbai, Maharashtra

- Supported production ERP environments, ensuring system availability, stability, and uptime.
- Performed **system administration** tasks including user management, role-based access control (RBAC), and security authorization management.
- Monitored **system performance**, logs, background jobs, and scheduled processes, proactively identifying and resolving issues to minimize downtime.
- Executed patches, service packs, and version upgrades following controlled **deployment procedures**.
- Worked closely with infrastructure teams for server, application, and **system monitoring** activities.
- **Automated** and scheduled recurring operational tasks and alerts to support daily system operations.

Internships

Acuradyne Systems, IIT Bombay

December 2023 – June 2024 (6Mo)

Software Intern

Mumbai, Maharashtra

- Developed a Python-based desktop application for real-time medical sensor data acquisition and preprocessing.
- Processed high-frequency sensor data (1000+ data points/second) with focus on reliability and performance.
- Stored processed sensor data securely in **AWS S3 buckets**, implementing structured data organization.
- Used **AWS Lambda** to execute machine learning inference and data processing tasks, enabling serverless execution.
- Deployed and managed backend services on **AWS EC2**, supporting application runtime and controlled access.

Skills

- AWS (EC2, S3, IAM, Lambda)
- CI/CD using **GitHub Actions**
- Infrastructure Automation with **Terraform** and **Ansible**,
- Containerization using **Docker**, Basic **Kubernetes**.
- **Git & GitHub** (version control and collaboration),
- **Bash/Shell scripting** for basic automation, Application & System Monitoring,
- Linux System Administration
- Production & Non-Production Server Management
- Incident Handling and Production Support.

Projects

- [DevOps-CI-CD-AWS](#)
End-to-end CI/CD pipeline using GitHub Actions, Terraform, Ansible and AWS EC2
- [AWS-Resource-Creation-Methods](#)
AWS Resource Creation Methods: Console, CLI, SDK & IaC
